## SOFTWARE SKILLS

3ds Max · Corona · V-Ray	97%
Unreal Engine	86%
Chaos Vantage	80%
AutoCAD	83%
Photoshop	86%
DaVinci Resolve	72%
After Effects	70%
Lumion	80%

## LANGUAGES

English	●●●●●
Hindi / Urdu	●●●●●
Arabic (basic)	●●●●●

## EDUCATION

Architecture & Interior  
Diploma  
2012 – 2013

Training in AutoCAD, 3ds Max & architectural drafting; construction detailing, materials, lighting, high-quality textures and scene optimization.

## About Me

Detail-oriented Senior 3D Visualizer with 12+ years of experience in architectural and interior visualization, including 3+ years in Dubai's fast-paced, high-end design industry. Specialized in photorealistic residential and commercial renders, known for sharp attention to detail, fast execution, and efficient handling of client requirements.

Skilled across 3ds Max, Corona / V-Ray and Unreal Engine, with strong command of lighting, materials, and composition. Proven ability to deliver under tight deadlines and collaborate with design, joinery, and site teams on residential, commercial, and fit-out projects.

## Experience

### 3D Visualizer & Interior Designer

Impart Design — Jabal Ali, Dubai

Nov 2024 – Present

- Developed high-quality 3D models and photorealistic renders using 3ds Max with Corona & Unreal Engine.
- Worked closely with design managers to translate concepts into execution.
- Coordinated with architects and designers to ensure design accuracy and feasibility.
- Produced high-end residential and commercial visualizations (villas, apartments, offices).
- Delivered multiple projects under tight deadlines, ensuring client satisfaction and timely approvals.
- Created realistic lighting setups (day / night scenes) and advanced material detailing.
- Handled revisions and design updates based on client feedback.

### 3D Visualizer & Coordinator

The Line Concept — Al Quoz 4, Dubai

Nov 2022 – Nov 2024

- Created high-quality furniture 3D visualizations using 3ds Max & Corona Renderer.
- Coordinated with design and project teams to ensure design accuracy and feasibility.
- Maintained high standards of render quality, lighting, and material detailing.
- Optimized scenes for efficient rendering without compromising quality.
- Managed multiple tasks simultaneously while meeting project deadlines.
- Translated design concepts into practical, execution-ready visuals.

## 📅 Experience — continued

### 3D Visualizer

De Studio 27 — Rajasthan, India

Jul 2019 – Aug 2022

- Developed high-quality 3D models and photorealistic renders for residential and commercial projects.
- Worked on architectural and interior visualization using 3ds Max & V-Ray / Corona.
- Collaborated with designers to translate concepts into realistic visuals.
- Applied detailed lighting, materials, and composition techniques.
- Managed multiple projects while ensuring on-time delivery.
- Delivered presentation-ready visuals for client approvals and marketing.

### 3D Visualizer

Flamingo Architects — India

Nov 2017 – Nov 2019

- Created architectural and interior 3D visualizations for various client projects.
- Worked independently on the complete workflow — from modeling to final rendering.
- Used AutoCAD, 3ds Max, and Unreal Engine.
- Delivered high-quality renders with focus on realism and detailing.
- Handled client communication and incorporated feedback and revisions.
- Managed multiple freelance projects with deadline-oriented delivery.

### 3D Visualizer

Shreya Bagda Design — Jaipur, India

Oct 2015 – Nov 2016

- Assisted in creating interior design concepts and 3D visualizations.
- Developed 3D models based on design layouts and sketches.
- Supported the team in preparing presentation visuals and design proposals.
- Worked on AutoCAD drawings and basic technical documentation.
- Gained experience in material selection and design detailing.

### 3D Visualizer

Creative Designer — Jaipur, India

2014 – 2015

- Assisted in creating 3D models and basic interior visualizations.
- Collaborated with designers to translate concepts into visual representations.
- Produced multiple views and perspectives for client presentations and approvals.

## Projects — Dubai & Abu Dhabi

### Dubai Marina Apartment

2026

- ◆ Visualized high-end apartment interiors with a focus on modern and minimal design aesthetics.
- ◆ Developed photorealistic renders using 3ds Max & Corona Renderer.
- ◆ Applied advanced material detailing (marble, wood, glass, fabric) for a high-end finish.
- ◆ Optimized scenes for efficient rendering without compromising quality.
- ◆ Delivered final visuals for client presentations and approval.

### SLB Office, Abu Dhabi

2025

- ◆ Developed office interior visualizations aligned with brand identity and functional requirements.
- ◆ Created realistic lighting for workspaces, meeting rooms, and reception areas.
- ◆ Designed and rendered multiple camera angles for presentation purposes.
- ◆ Ensured consistency in materials, colors, and overall design language.
- ◆ Delivered high-quality renders for client approval within tight deadlines.

### Bluewaters Apartment, Dubai

2025

- ◆ Visualized high-end apartment interiors with a focus on minimal and modern design.
- ◆ Worked on material detailing, especially glass, fabric, and lighting elements.
- ◆ Created close-up shots to highlight furniture and decor details.
- ◆ Delivered optimized scenes ensuring fast rendering without quality loss.
- ◆ Supported the design team with multiple revisions for final approval.

### EPIMON Office, Dubai

2025

- ◆ Developed office interior visualization aligned with brand and functional requirements.
- ◆ Created realistic lighting setups for workspace, meeting rooms, and reception areas.
- ◆ Prepared visuals for client presentations and internal approvals.
- ◆ Ensured consistency in design language across all views.
- ◆ Assisted in translating design into technical drawings and execution-ready details.

### Palm Jumeirah Villa, Dubai

2024

- ◆ Designed and visualized luxury villa interiors and exteriors.
- ◆ Focused on high-end materials such as marble, wood, and custom furniture detailing.
- ◆ Achieved realistic lighting using Corona Renderer (day & night scenes).
- ◆ Delivered high-quality renders for client approval and marketing use.
- ◆ Ensured attention to detail in textures, reflections, and composition.

## ◆ Projects — Jaipur, India

### Residential Villa Interior, Jaipur

2021

- ◆ Visualized complete villa interior spaces including living, bedroom, and kitchen areas.
- ◆ Created photorealistic renders using 3ds Max & V-Ray / Corona Renderer.
- ◆ Focused on modern and functional interior design concepts.
- ◆ Applied detailed materials, lighting, and furniture placement.
- ◆ Delivered final visuals for client presentations and design approvals.

### Luxury Apartment Interior, Jaipur

2020

- ◆ Developed high-end apartment interiors with focus on minimal and elegant design.
- ◆ Worked on material detailing including marble, wood, glass, and fabric finishes.
- ◆ Created multiple camera views and close-up shots for presentation purposes.
- ◆ Optimized scenes for efficient rendering without quality loss.
- ◆ Handled revisions based on client feedback and requirements.

### Cars24, Commercial Office Interior, Jaipur

2018 – 2019

- ◆ Designed and visualized office spaces including workstations, cabins, and reception areas.
- ◆ Created realistic lighting setups for functional and professional environments.
- ◆ Ensured alignment with client brand identity and workspace requirements.
- ◆ Delivered high-quality renders for client approval and execution reference.
- ◆ Coordinated with designers for layout and design improvements.

### Showroom Interior Design, Jaipur

2018

- ◆ Developed showroom & office interior visualization aligned with brand and functional requirements.
- ◆ Created realistic lighting setups for workspace, meeting rooms, and reception areas.
- ◆ Prepared visuals for client presentations and internal approvals.
- ◆ Ensured consistency in design language across all views.
- ◆ Assisted in translating design into technical drawings and execution-ready details.

### 2BHK / 3BHK Apartment Interior, Jaipur

2016 – 2017

- ◆ Delivered multiple residential interior projects including 2BHK and 3BHK apartments.
- ◆ Created detailed 3D models from AutoCAD layouts and client requirements.
- ◆ Applied realistic lighting, textures, and furniture arrangements.
- ◆ Produced visuals for client approval and execution support.
- ◆ Managed multiple small-scale projects with quick turnaround time.

## 📅 Industry Experience

Over 12 years of professional experience in architectural and interior visualization, including 3+ years in Dubai, UAE, working on high-end residential, commercial, and fit-out projects. Strong expertise in handling complete project workflows from concept to final render, alongside technical drawings and coordination with production and site teams.

## ★ Key Strengths

- ✓ High attention to detail with strong visual storytelling skills.
- ✓ Advanced expertise in photorealistic rendering and scene optimization.
- ✓ Proven ability to manage deadlines and fast-paced project environments.
- ✓ Experience handling multiple projects simultaneously.
- ✓ Problem-solving mindset with ability to handle complex design challenges.
- ✓ Strong collaboration skills with cross-functional teams.
- ✓ Efficient in client communication and revision handling.
- ✓ Adaptable and quick learner with continuous skill improvement.
- ✓ Good understanding of technical drawings and execution details.
- ✓ Deep knowledge of Dubai design standards and client expectations.

## ★ Achievements

- ◆ Delivered 20+ high-end residential & commercial projects across Dubai within tight deadlines.
- ◆ Produced photorealistic renders that secured client approvals on first presentation.
- ◆ Improved render quality and workflow efficiency by ~20–30%.
- ◆ Worked on luxury Dubai projects — Palm Jumeirah, Bluewaters, signature villas.
- ◆ Handled 5–8 concurrent projects in a fast-paced environment.
- ◆ Specialized close-up detailing for furniture, materials & décor, enhancing presentation quality.
- ◆ Optimized scenes and materials, reducing system load and improving render performance.
- ◆ Achieved consistently high client satisfaction with quality renders.
